SUMMARY

Junior Software Engineer with practical experience in C#/.NET and full-stack application development using Django, React.js, and Flutter. Familiar with SQL databases, application integration, technical troubleshooting, Git, and basic CI/CD practices. Experienced with Docker and Kubernetes through software projects, with an interest in developing reliable and scalable enterprise applications. Eager to contribute to software development and application support in a collaborative environment.

PROFESSIONAL EXPERIENCE

Manodharaa(Pvt)Ltd, *Software developer* 11/2024 – 05/2025

- Developed and maintained software applications using C#/.NET and Django.
- Worked on backend functionality, database operations, and application integration.
- Assisted in identifying and resolving software defects and technical issues.
- Used Git and GitHub for version control and collaborative development.
- Contributed to application deployment and CI/CD processes.
- Collaborated with team members to implement and improve application features.

Freelance Software Developer 10/2025 – Present

- Developed and maintained websites and independent software applications, including a client website for Fresco Travels.
- Integrated Supabase for backend services and database management, including review submission and moderation functionality.
- Worked on frontend development, responsive UI design, and website functionality.
- Explored Artificial Intelligence and Machine Learning concepts through practical projects and API integrations.
- Implemented modern frontend and backend technologies.
- Improved software development, problem-solving, and technical skills through continuous learning and hands-on projects.

EDUCATION

Higher National Diploma in Information Technology(HNDIT), *SriLanka Institute of Advance Technological Education (SLIATE)* 2022 – 2025

PROJECTS

Dhamma Library System

- Developed a role-based web application for managing and streaming Dhamma content with secure access control
- Implemented multiple user roles with admin panel functionality
- Tech: Django, PostgreSQL, Docker

Kubernetes Monitoring System

- Built a monitoring and observability solution for Kubernetes environments with metrics tracking and distributed tracing
- Improved system reliability and performance visibility using modern observability tools
- Tech: C#, Prometheus, OpenTelemetry, Helm

Workout & AI Chatbot System

- Developed a fitness management system with an integrated AI chatbot for workout guidance and user support
- Designed responsive UI and efficient backend data handling
- Tech: .NET, MSSQL

Healthcare Management Application

- Developing a Flutter mobile application for prescription uploads and pharmacy availability checking
- Enables pharmacists to review requests and respond to users in real time
- Tech: Flutter, Firebase

SKILLS

Programming Languages & Frameworks
C# ,Java ,Python , .NET Core, Flask, Django, ReactJs, Flutter, WordPress

Web Technologies
HTML, CSS, JavaScript

Design Tools
Figma, Canva

Database
PostgreSQL, MYSQL, MSSQL, Firebase

Devops & Cloud
Kubernetes, Docker, Helm, Prometheus, OpenTelemetry, CI/CD Basic

Tools
Git, GitHub, Postman, VS Code, Visual Studio, Android Studio

COURSES

Certificate of Spoken English, *University of Colombo*

Certificate of HRM, *Minco College (Online)*

LANGUAGES

- Sinhala
- English
